

YOUR BUSINESS IS ON THE **MOVE** – WHY ARE YOUR **IT** SOLUTIONS STANDING STILL?

Simply the most...

- Powerful
- Flexible
- Extensible
- Friendly
- Affordable

...business systems ever.
And in record time!!!

THERE'S ONLY ONE SOLUTION.

eRUPT!K

NEW TECHNOLOGY. **NEW RULES!**

eRUPTIK

NEW TECHNOLOGY. NEW RULES!

“TURNING THE IT WORLD UPSIDE DOWN”

WHO WE ARE AND WHO WE'RE NOT!

Eruptik Technologies is an Information Management solution provider that delivers the impossible. With its radical development model and innovative technology, Eruptik has proven that IT consultants and their clients can dare to dream...

ERUPTIK AND ITS PARTNERS DELIVER IMPOSSIBLY POWERFUL BUSINESS SYSTEMS:

- Faster than any one else – we're talking an order of magnitude here!
- For less money than anyone else – tens of thousands of dollars less!
- That are future-proof – Eruptik technology is 100% backward compatible – with just a few clicks, systems can automatically be upgraded with the latest features and functionality

Eruptik uses an iterative development process that adapts to clients' ever-changing requirements. With Eruptik, negotiating frustrating change requests is a thing of the past.

Whether a business is looking for an inventory tracking system, sales process management solution, Web site CMS, image or document library, extranet/intranet, scheduling/booking/tracking system, process management application, CRM solution or financial analysis tools, Eruptik can deliver it faster and more affordably than anyone else.

Why? Because we've already developed them all and incorporated their functionality into our "knock em dead" secret sauce.

“After my experts' socks were blown away with Eruptik's combination of speed, power and reliability, we commissioned and launched our new global CRM and workshop management system from Australia to Malaysia to Africa to the UK, and throughout the US and Canada – in record time and for a fraction of what I'd expected to pay.”

– Peter Frampton
Chairman, Comes Alive International

WE BREAK ALL THE RULES! Here are just a few...

THE OLD RULE!	THE ERUPTIK RULE!
<i>Businesses must accept the fact that they will be constrained by their software solutions</i>	<i>Businesses should expect management systems to adapt to their ever-changing needs</i>
<i>Businesses must accept the fact that change requests are an inevitable part of system development</i>	<i>Change requests should be extinct.</i>
<i>Custom systems are cost prohibitive and take a long time to deliver</i>	<i>Custom systems built with Eruptik will be delivered faster and cost less than any "packaged" solution on the market today</i>
<i>Business growth requires replacement of existing systems with bigger more costly solutions</i>	<i>Systems designed today must be extensible to grow as businesses prosper</i>
<i>Sharing data between disparate systems is only a pipedream</i>	<i>Sharing data between systems and people is an integral part of every Eruptik system</i>

ERUPTIK

NEW TECHNOLOGY. NEW RULES!

“ON THE FLIP SIDE!”

WHAT WE'VE HEARD THROUGH THE GRAPEVINE ABOUT US...

When you take on the IT industry the way we have and challenge conventional system delivery methodologies, you start to create some buzz out there.

OUR CLIENTS THINK WE'RE MAGIC!

Yes, we do have some tricks up our sleeves, but if we told you about them, we'd have to shoot you. Suffice to say, customers are amazed by what we can do and how we do it.

OUR COMPETITION THINKS WE'RE CRAZY!

A wise person once said *“The definition of insanity is doing the same thing over and over again expecting a different result.”*
– quoted attributed to: rita mae brown, albert einstein and others”

For years, IT companies have promised their clients faster time to market, better quality and lower costs, but have done nothing to change their development models and business processes. Hence, they have not been able to deliver on their promises.

And they call us crazy!

“It never fails to amaze me how quickly systems with complex data, complicated workflows and demanding reporting requirements can be delivered.”

– **Phil Arctander, President**
PARC Systems Inc.

OUR VISION – TO TURN THE IT WORLD UPSIDE DOWN!

For decades, the IT industry has exploited clients by over-charging, under-delivering and holding customers hostage in a world of “locked-in” requirements specifications, missed deadlines and escalating costs.

Eruptik believes it's time for a revolution. So together with its partners, Eruptik is turning the IT Industry upside down with new radical approaches in requirements gathering, custom development, testing and deployment of business information systems.

Eruptik's approach includes partners and clients up front in a development process that employs prototyping of requirements and rapid iterative development. The collaborative nature of the Eruptik approach

mitigates risks, minimizes the impact of “surprises”, and ensures that “issues” are identified and resolved early in the project.

Within a few days of the start of a project, clients see a working system running so they can quickly provide feedback and start to enjoy watching the system evolve and grow.

An added benefit to this teamwork is a faster time to deployment because customers are trained on the system throughout the process without even realizing it.

Needless to say, IT traditionalists, and companies who charge hundreds of thousands of dollars in license and customization fees, do not share our vision for a faster, better and more affordable way to deliver high value to our customers.

“With an international customer base, tracking our sales and our customers' project details, deadlines, and costs is key to our success. Eruptik is superb, and their ability to so rapidly customize the product to integrate our other unique business requirements is incredible”

– **Mike Casely-Hayford**
Icon Communications

PARTNERS

Eruptik Technologies Inc is proud to work with some of the brightest and most visionary consultants and analysts in the technology industry. Together with these partners, we are on a mission to create a new world where:

- clients aren't shackled by long winded requirement specifications they could never get 100% right, no matter how hard they tried
- trying something new is no longer considered risky – instead it liberates customers to explore new ideas that lead to better solutions
- being amazed at what can be accomplished with limited time and money becomes the new "status quo"

FIND THE SOLUTION.
